

IH Program Management

Industrial Hygiene Done Right

A cloud software solution that simplifies coordination and control of your IH program, and helps communicate the value of IH across your organization.

Core Capabilities

- Similar Exposure Groups
- Qualitative Exposure Assessment (QEA)
- Global Chemical/OEL Database
- Sample Plans
- Lab & Consultant Management
- Reporting & Analysis

The Help You Need, the Way You Need It

If you're responsible for IH in your workplace, but don't have a formal IH background, you're not alone. The number of in-house IH professionals has dwindled in recent years, with more and more businesses outsourcing IH due to lack of resources or expertise.

In addition, IH is often decentralized, with individual sites and departments managing IH data and processes in separate silos. Decentralized systems are unable to communicate with each other, which makes creating a cohesive picture of IH performance and communicating the value of your IH program to management next to impossible.

Whether you're a Certified Industrial Hygienist (CIH) or new to IH, VelocityEHS provides a simple, low-cost software platform designed by IH professionals to help you implement a world-class IH program. You get sophisticated, easy-to-use tools for managing SEGs and QEAs, sample plans, lab and consultant data, statistical analysis and reporting, while our Global Chemical/OEL database makes compliance with global IH

standards easier than ever. It's the detailed control and visibility you need to protect the health of your workplace and more effectively demonstrating the value of your IH program.

Your IH Command Center

Unlike other IH software products, IH Program Management is an active, fully-integrated software platform that helps you implement and maintain a comprehensive IH program built upon established AIHA management principles.

By integrating your IH sampling data, SEGs, QEAs, sampling plans, database of stressors and OELs, analysis, reporting and other IH functions into a single system, IH Program Management minimizes the number of steps required to perform critical IH program tasks, saving you significant time and effort. For instance, employee exposure and SEG data can be auto-populated into medical surveillance data fields to minimize manual data entry and streamline compliance.

With your IH Program functions integrated into a single intuitive platform, you can improve efficiency and visualize key data and reports in real-time to help you make faster, more confident IH management decisions.

The VelocityEHS Platform

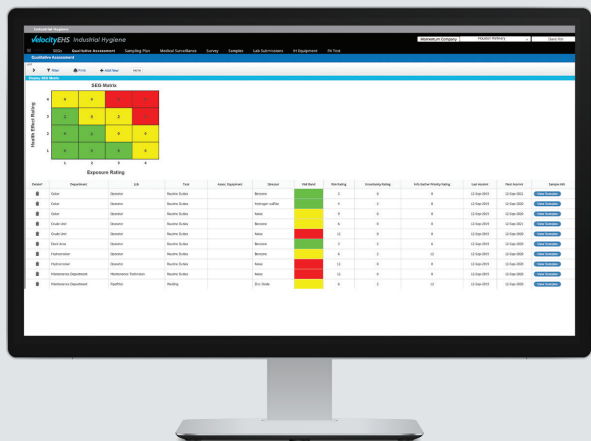

Check out all of our EHS management products, including:

- Air Emissions
- Audit & Inspection
- Compliance Management
- Corrective Action
- Ergonomics
- Incident Management
- Industrial Hygiene
- Management of Change
- SDS/Chemical Management
- Training & Learning
- Performance Metrics
- Risk Management
- Safety Meetings
- Training Management
- Waste Compliance
- Water Quality

Features & Benefits

Drive IH Program Performance

- Assign personnel to Similar Exposure Groups (SEGs)
- Develop, schedule & manage sampling plans
- Track SEGs & flag for qualitative exposure assessments (QEAs)
- Ensure compliance with our continuously-updated global chemical/OEL database

Simplified Data Management

- Streamline data entry with pre-built templates & auto-populated fields
- Quickly select your unique stressors from our Global Chemical/OEL Database
- Provide labs with secure access to directly upload analytical results, helping minimize errors and streamline work processes

Enhance Visibility of Workplace Risks

- Generate detailed risk matrices to visually communicate risks to management
- Perform in-depth statistical analysis of sample data (Geometric mean, SD, %>OEL, UCLs, LCLs, 95/95 UTLs, etc.)
- Perform Bayesian analysis or export data to third-party BI tools for custom analysis

The VelocityEHS Advantage

True Cloud Solution

Our products are cloud solutions that can be deployed when and where you need them, with no software to download or install.

Helping You Be Better

Eliminate the day-to-day burdens associated with IH program management so you can focus on being a more effective EHS leader.

Delivering Value

Designed with continuous feedback and industry insights from customers like you, our solutions are more affordable, quicker and easier to implement, and provide the simplest user experience for you and your employees.

Solving Complex Problems Simply

Our simple design and intuitive user-interface means that you spend less time using the software, and more time focusing on the overall safety and health of your facilities and your employees.

Providing Personalized Service and Support

Our IH Program Management is backed by our expert team of Customer Experience professionals who'll give you the individual attention you need to help reach your EHS goals faster.

Well-designed and intuitive solutions that are available across any device via the cloud give you and your employees anytime, anywhere access to the VelocityEHS platform.
